

【Scholarships Application Procedure for privately financed international students】

There are two types of scholarships for privately financed international students

1. 'University-recommended Scholarships,' which is screened with your registered basic data by the university.
- 2 'Scholarships you can apply directly' (open application)

1. You may apply for both types of scholarships at the same time.
2. Eligibility to receive both types of scholarships depends on the provisions of the foundation.
3. If you are selected for both types of scholarships, you must withdraw the scholarship which you applied directly. You may receive both scholarships at the same time only when both foundations allow.
4. Completing registration of your data does not mean to guarantee your receiving any scholarships. To apply for any university-recommended scholarship, you **MUST** register your information for internal screening.
5. Only successful candidates of the internal selection will be notified by email.
6. **You can register your data to apply for scholarships requiring the University's recommendation for spring and fall semesters at the same time.** Then you do not have to submit the application forms again for fall semester.
